

## COMPANY BACKGROUNDER

Ensynch, Inc. is an award-winning leading provider of IT solutions that help growing businesses operate more efficiently and with greater agility through better, more strategic use of technology and resources. By leveraging its deep technical and industry expertise, Ensynch empowers mid-size to Fortune 500 companies by providing a full range of secure, reliable and cost-effective services customized specifically for clients' business needs.

The name Ensynch comes from the Latin terms “*en*” meaning “make” and “*synch*” meaning “alignment,” Ensynch provides strategic solutions throughout the IT lifecycle, fully bridging the gap between people, process and technology.

The firm's IT services include: strategy, implementation, staffing and managed services that range from colocation to remote monitoring to fully-outsourced IT hosting solutions and management. These services are delivered professionally and flexibly to businesses across verticals through its over 200 IT professionals and strategists in the U.S. and internationally.

Ensynch constantly innovates and refines its service offerings so that clients receive the latest and most salient solutions to their business and IT challenges.

The firm's executive team is made up of industry leaders with extensive experience in information technology and business processes. Ensynch was founded in 2000 by technology entrepreneur Kurt Bunney, Ensynch was launched with the mindset that the mid-market organization needed enterprise level IT services and managed hosting that aligned technology with business needs.

Gene Holmquist serves as the company's President and CEO, drawing on over two decades of experience within the IT industry. Holmquist, together with his co-workers and Founder Kurt Bunney, have taken Ensynch and transformed it into an emerging leader in the IT Services market, and bears strategic partnerships with industry heavyweights like Microsoft

Ensynch's offering is unique to a somewhat fragmented industry in that the company offers a comprehensive and unified suite of services not typically delivered by one provider to mid-market companies. Via its three-pronged offering, Ensynch provides distinctive advantage to its clients by delivering the following services:

- 1) Consulting—Known as Ensynch's Professional Services offering, the firm's technical and project management experts provide design, strategy and implementation based on best practices in technology infrastructure and application management
- 2) Staffing—Known as Talent Services, this is where Ensynch recruits and staffs technical experts for clients' IT department on-demand staffing needs
- 3) Managed Services—Called EnDemand™, Ensynch manages customers' IT server and network infrastructure within its data center hosting facility and remotely where technical experts monitor customers' business systems and provide support 24/7/365.

The company is headquartered in Tempe, Ariz., with offices in Southern California. Additionally, Ensynch owns and operates a state-of-the-art data center facility located in Tempe, Ariz.

Ensynch's mission is to be the leading IT-business partner to growing mid-size and enterprise-level companies seeking competitive advantage in their respective marketplaces. Ensynch's goal is to empower these organizations through deep industry know-how and best practices that dramatically streamline and maximize clients' technology investments.
